

The Department of Work and Pensions (DWP) has published an update to statistics on the number (and proportion) of children living in low income families across Great Britain by local area. The local estimates are broken down by Local Authority, Ward, and Westminster Parliamentary Constituency.

Fife picture

18.0% of children in Fife (11,038 aged under 16) are living in relative poverty before housing costs. 8,925 children (14.6%) are living in absolute poverty before housing costs. Both are above the Scottish rates of 16.3% and 13.2% respectively. Although child poverty levels in Fife remain above Scotland, Fife has seen a slightly larger decrease in the rate of children living in relative poverty (-1.7 pp) compared to Scotland (-1.5 pp).

Table 1 – Number and Percentage of Children aged under 16 living in Relative and Absolute Poverty (Before Housing Costs), in Fife and Scotland, FYE 2024 (Source: DWP)

	Relative Poverty		Absolute Poverty	
	Number	%	Number	%
Fife	11,038	18.0%	8,925	14.6%
Scotland	145,804	16.3%	118,341	13.2%

The latest figures show a reduction in child poverty across Scotland, reflecting a change to the methodology to include the Scottish Child Payment (SCP) – a payment to help low-income families towards the costs of looking after children - as a form of income. In 2023, before taking account of Scottish Child Payment, 23.6% of Fife children (15,024) were in relative poverty. By including Scottish Child Payment in the methodology, 2,906 children in Fife were lifted out of poverty in 2023 (a difference of 3.9 pp for Fife, compared to 3.5 pp for Scotland).

How Fife compares

Poverty affects children in every part of Scotland, with an estimated 26.4% of children living in relative poverty in Glasgow compared to 8.0% of children in East Renfrewshire (see **Figure 2**):

Technical Notes

The Children in Low Income Families methodology was adapted for the March 2025 publication and now includes imputed receipt of Scottish Child Payment (SCP) for eligible families as a form of income.

Scottish Child Payment began in February 2021 and is a payment to help low-income families towards the costs of looking after children. It was originally given to households with children under the age of six, but this was extended to include children under 16 years old from November 2022.

The imputation methodology assumes that every family eligible for SCP claims it i.e. that the take-up rate is 100%. This contrasts with the published [SCP take up rates](#) which show that for children aged under 6 in 2023/24 take up was 97% and 85% for children aged 6 to under 16.

Note: changes to the methodology mean that 2024 figures cannot be directly compared to what has been reported in previous years.

Since the last release, boundary changes for Fife's Westminster Parliamentary Constituencies now reflect those from 2024.

These statistics complement and should be viewed as a companion release to the Households Below Average Income (HBAI) survey on children in low income households which provides National and Regional estimates, but not local area estimates.

While the data has undergone extensive quality assurance prior to publication, DWP recommend that users exercise additional caution when using the data, particularly when making comparisons with previous years and when comparing local areas across countries. Figures for the latest year are provisional and will be subject to revision in subsequent releases.

To be classed as low income in these statistics, a family must have claimed one or more of Universal Credit, Tax Credits or Housing Benefit at any point in the year.

Relative low income measures families (a single adult; married or cohabiting couple; or a Civil Partnership; and any dependent children) in low income (not households) in the reference year, whereas Absolute low income measures families in low income based on what low income looked like year ending 2011.

Income is Before Housing Costs (BHC) and is equivalised to adjust for family size and composition.

This is an annual release and the next release will be in Spring 2026.
